## Universal Splint | Set

### AEROresc® - EASY Splints

Universal Splints for immobilization of almost every human limb and the cervical spine. Made of light weight and radiolucent materials: Surface of plastic foam (IPXE), patient side „blue“, outside „yellow“ - the core is made of a figurine aluminium conglomeration.

EASY Splints - Splints for almost every application area.

### Advantages

- Structured surface on the patient side ensures a secure grip and better air circulation
- Liquid-repellent (blood, secretion, perspiration)
- Radiolucent
- Flexible: Roll- and foldable
- Lightweight | Compact and space - saving | Cuttable
- Usable as infusion splint (esp. in neonatology & pediatrics)

### Basic Usage and Application Examples

#### C-Curve | Strong

Pull both edges to the inside for using the C-curve. This form guarantees solid and unbendable.

#### Reverse C-Curve | Stronger

Put splints into C-curve. Then shape the edges into to the oppsite direction.

#### T-Curve | Strongest

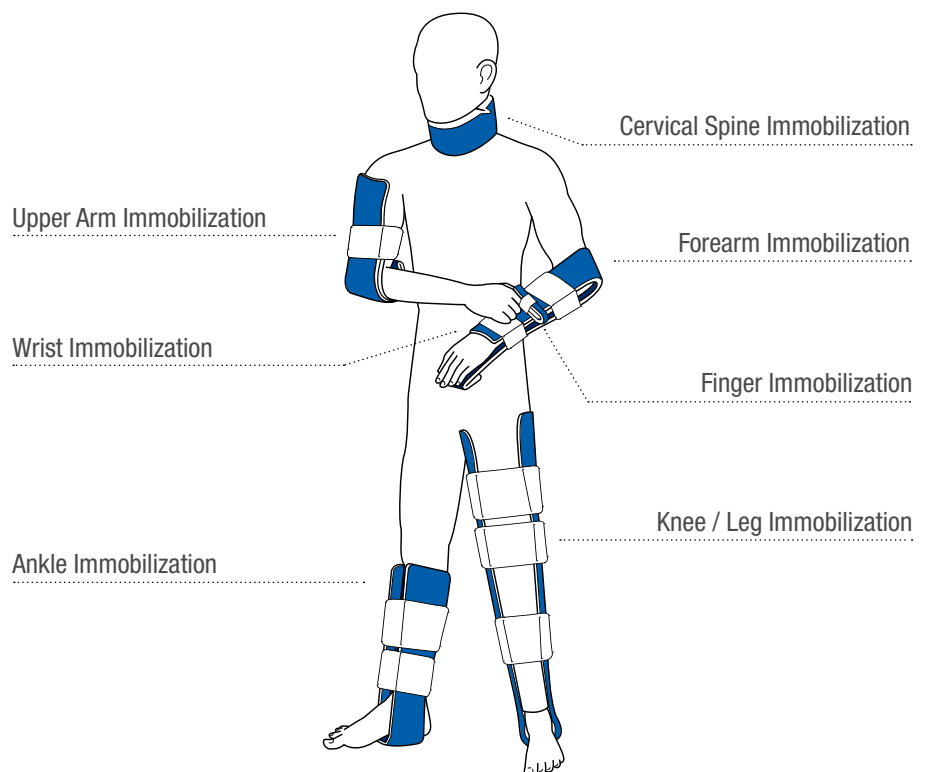

Put the edges on top of each-other. Then bend half of every side until a 90 ° angle is given. This shape guarantees a maximum stability.

Better air circulation | Secure grip

### Application areas

- Medical service
- Hospitals
- Neonatology
- Police, fire departments
- Schools, companies
- Spare time and sports
- Much more
