INGREDIENTS	Purified Water, Melaleuca Alternifolia, Emulsifiers and Preservatives

BurnFree solves the immediate first aid needs for all types of burns by relieving the pain, rapidly removing the heat, and cooling the burn.

BurnFree Sterile Dressings are designed for first aid use on all types of burn injuries. The dressings are constructed of a special, soft, open-cell foam, and are elastic enough to accommodate possible swelling or the need to flex joints. BurnFree dressings are non-adherent and the inert foam will not shed threads, strands, or fibers that could become embedded in the wound. The pliable foam holds 50 times its weight in gel. This means that more BurnFree gel will stay in contact with the burn.

The BurnFree 4” x 4” (10cm x 10cm) Sterile Dressing is our most popular dressing. It is a standard size that works for most burn applications.
