## Pocket Masks | CPR Face Shields

### AERObag® - PMB06 Pocket Mask

The AERObag® - PMB pocket mask protects the first-aiders within the mouth-to-mouth resuscitation in emergency situations. It avoids the direct contact between patient and first-aiders, protects against vomit and provides a perfect breathing control.

with one-way valve | spare filter | vinyl single use gloves

### Safe

- Double protection through one-way valve and separate bacterial filter
- Added protection against infections through vinyl-single-use gloves
- Clear rigid shell of PVC enables a better monitoring of the patient

### Flexible

- Oxygen adapter for administration of oxygen for breathing and non-breathing patients
- Can also be used with manual resuscitators and ventilators

### High easy of use

- Easy unfolding mask provides a perfect fit with the smooth air lip
- Easy and safe transport guaranteed with the robust hard-case

### Technical data

#### Temperature ranges

Operating: -18 - +40 °C

Storage: -30 - +50 °C

#### Material

Mask: Polyvinyl chloride (PVC)

Mouthpiece: Polycarbonate (PC)

Filter media: Hydrophobic membrane

Single-use-gloves: Polyvinyl chloride (PVC)

Hard-case: Polypropylene (PP)

#### Dimensions and weight

Hard-case: 130 x 106 x 48 mm

119 g

#### Connections

Mask: OD 15 mm

Oxygen: OD 6.4 mm

Private label option

- different colours\* with customized logo possible!

### Design and order your individual pocket mask

blue

red

orange

white

Minimum order quantity: 640 pcs. per color

Delivery time: 12-21 weeks

\* Slightly color variation possible

## AERObag® - CPR face shields

The AERObag® - face shields are developed for the resuscitation on adults in emergency situations. They are additives for the mouth to mouth resuscitation which should avoid the direct contact to the patient and reduce the risk of contamination.

Effective helpers for a simple mouth resuscitation in emergency situations

## HUM CPR face shields - in different colors with HUM-Logo!

black blue/lila red gold green blue

\*Slightly color variation possible

## The advantages of the CPR face shields:

- Avoid direct contact with the patient
- Reduce inhibition threshold during mouth resuscitation
- Reduce the risk of infection
- Easy and safe to use
- Space-saving, with key ring - always and everywhere ready to use

## Ear straps

- For perfect fit during the cardiac massage

## One way valve

- Air flow into patient's direction only
